

Enroute Networks Becomes Authorized Reseller of CLEAR™ 4G Mobile Internet Service

Marietta – November 17, 2009 – Enroute Networks, a leading provider of information technology and data communications services, announced today that they have entered a partnership agreement with Clearwire Communications, LLC. Under the terms of the agreement, Enroute Networks becomes an authorized reseller of CLEAR™ wireless internet services.

CLEAR service makes wireless internet available at broadband speed to nearly three million consumers and businesses – at home, in the office and on the go. Clearwire Communications entered the Atlanta market earlier this year with their deployment of the largest 4G WiMAX wireless broadband network in the United States.

“As a CLEAR authorized reseller, we can help our customers continue to make wise decisions about the best voice and data platforms for their unique business requirements,” explained Dave Hampson, President and CIO of Enroute Networks. “What sets Enroute apart from other resellers is that we can provide a business owner with guidance on the design and deployment of their WAN or a circuit/VPN backup solution at the same time they are evaluating mobile WiMAX.”

In addition to Atlanta, CLEAR mobile WiMAX is available in Baltimore, Maryland, Portland, Oregon and Las Vega. The company plans to bring CLEAR to 80 markets and up to 120 million people by the end of 2010.

About Enroute Networks

Enroute Networks, Inc. is a leading information technology services provider, solving the data-communications and security challenges of small to medium sized businesses for more than eight years. A Cisco Premier Certified Partner, Enroute is based in Marietta, Georgia, a suburb of Atlanta, and serves customers with headquarters throughout the southeast as well as in key locations across the United States and even internationally.
